Contact: +91 91821 69185 - Visakhapatnam, Andhra Pradesh

Objective

Enthusiastic and dedicated B.Tech Computer Science student (3rd year, 1st semester) who excels at leveraging AI-assisted development tools (such as LLMs, Copilot, and Cursor) to accelerate full-stack web engineering. Combines a solid understanding of core computer science concepts with advanced AI workflows to rapid-prototype features, debug complex database schemas, and deploy secure backend APIs at high velocity. Eager to bring high-productivity, AI-driven development capabilities to an internship role.

Education

B.Tech in Computer Science and Engineering **Year: Expected 2028 (3rd Year, 1st Sem)**
Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology, Chennai
Percentage: 74%

Intermediate (12th Grade) **Year: 2024**
Sri Chaitanya Jr. College, Visakhapatnam
Percentage: 77%

Professional Experience

Backend Engineer Intern **Jul 2026 – Present**
Tribly Tech Pvt Limited

- Led the backend systems design and API integrations for the **Fineset** web application, utilizing AI code assistants to increase development velocity.
- Built secure RESTful endpoints and configured session logs (JWT/bcrypt) using prompt-driven coding and review workflows.
- Optimized database schemas and SQL queries under AI-guided profiling.

Full Stack Engineer Intern **Jun 2026 – Jul 2026**
Tekspot Global Solutions

- Developed full-stack web application features, leveraging LLM debugging tools to quickly identify and resolve state-management bugs.
- Created database configurations and designed React UI dashboards using AI-assisted rapid prototyping methods.
- Integrated server logging and configured structured API responses.

Core Coordinator & Web Developer **Feb 2026 – Present**
Yantriksha X Hub (Vel Tech)

- Coordinating technical activities across multidisciplinary clubs (Engineering, Law, Business).
- Built the official Next.js web application utilizing AI-assisted workflows to draft the team matching logic, milestone reports, and admin panels.

Post Logistics & Production Head **Apr 2026 – Present**
Just Between Us Official

- Maintained logistics schedules, managed production resource logs, and coordinated teams to ensure project releases run on schedule.

Technical Skills

AI-Assisted Development: Cursor, GitHub Copilot, Prompt Engineering for code generation, debugging, and code review
Languages (Core Concepts): JavaScript, TypeScript, Python, C, C++, SQL

Backend & Databases: Node.js, Express, Next.js API Routes, MySQL, PostgreSQL, SQLite, JWT, Bcrypt, Nodemailer

Frontend & Design: React, HTML5, CSS3, TailwindCSS

IoT & Hardware: Arduino, ESP8266, Microcontrollers, Sensors

Machine Learning: TensorFlow, Text Classification, Object Detection, Landmark Detection

Projects

Yantriksha X Hub Web Platform

Next.js & MySQL

- Developed an online team matchmaker allowing student groups to validate legal, business, and engineering requirements.
- Structured a gamified 14-stage roadmap checklist to track project milestones from brainstorming to corporate funding.

AI & Computer Vision Frameworks

Python & TensorFlow

- Implemented deep learning models for classification, object recognition, and coordinate landmark localization.

Certifications & Achievements

- Won 3rd prize in Aerospace Hackathon, Hyderabad (MLRIT University).
- Earned Python AIML-based Internship Certificate during project terms.
- Developed IoT Environmental Sensor Hub utilizing C++, Arduino, and ESP8266 modules.
